Niagara Region will shuffle its traffic speed camera deck this month with a new installation near West Niagara Secondary School coming online.

The new stretch of Hwy. 8 - Main Street East - was designated a Community Safety Zone in August 2023 - between Lawrence Avenue and Durham Road.

"The cameras have been decommissioned from the last ASE rotation locations (Blessed Trinity) and will begin enforcement in the new locations in early 2025, after a period of testing and verification," said Frank Tassone, Niagara Region's director of Transportation Services.

"The Region will be issuing a public notice advising of the timing and locations of the new active automated speed enforcement locations in the New Year."

Lincoln will have no speed cameras operational in the January-April time frame, while West Lincoln will see the unit go live on Station Street, Spring Creek Road and West Street.

"When the cameras become active the "coming soon" is removed from the automated speed enforcement road signs and "in use" is displayed on the signs. When cameras are no longer in use, automated speed road signs are removed," said Janet Rose, a Niagara Region communications consultant.
